Telephone 031 650 1000

or direct dial 031 650 5547.

Thank you very much for your note about my article on chemical mutagens etc. We were intended to leave, from Lotte's 1st Nature paper reporting that allylisothiocyanate was mutagenic, that you had guessed that mustard was also mutagenic. Of course Lotte could not report that during the war because of the military restrictions

Thanks also for your reprints about Nuker etc. I read them all with much interest.

With best wishes

Geoffrey
